

Jeison Julian Sosa

Technical Support Engineer

Bogota, Colombia | 302 842 2233 | jeisonjsosar@gmail.com

Profile

Bilingual Spanish-English Technical Support Engineer with over 2 years of experience in high-tier, client-facing technical support and full-stack software development. Proven expertise in API integrations, web ecosystem technology stacks, and general-purpose programming languages. Adept at debugging code, troubleshooting complex deliverability and connectivity issues, and managing high-pressure situations with diplomacy. Combines deep technical fluency with outstanding communication skills to de-escalate tense situations and translate complex technical architecture into concise, actionable feedback for both developers and enterprise clients.

Core Strengths

Technical troubleshooting & code debugging	REST APIs & web ecosystem infrastructure
Twilio product exposure	Client-facing bilingual support
Cross-functional collaboration	Incident de-escalation & customer success
CRM pipeline & ticket management	Workflow optimization & process betterment

Professional Experience

Asurion / Solutio <i>Premium Technical Support Representative, Bilingual</i> • Provided high-tier, bilingual technical support for enterprise software ecosystems, maintaining exceptional customer satisfaction metrics and survey outcomes. • Gained direct exposure to Twilio's communication products, utilizing platform workflows to ensure efficient support and connectivity. • Resolved complex mobile, network, and phone-service issues through rigorous analytical troubleshooting and personalized code/technical guidance. • De-escalated tense customer situations in live environments, providing diplomatic, professional, and empathetic conflict resolution. • Managed case pipelines and documentation adhering strictly to standard operational processes and ticketing workflows.	May 2024 – Jul 2025 Bogota, Colombia
3dordi.io <i>Blockchain Full Stack Developer</i> • Execute full-stack software development, debugging client-side and server-side code, and managing RESTful API integrations across decentralized architectures. • Architect Model Context Protocol (MCP) servers to automate communication workflows and integrate AI agents with core product APIs. • Collaborate closely with engineering teams via Slack and issue tracking tools to document reproducible bugs, manage feature requests, and align infrastructure with industry standards.	Jan 2026 – Present Bogota, Colombia
brids.io <i>Solana Blockchain & Full Stack Developer</i> • Lead the development and technical optimization of a crypto fintech application using modern web technology stacks including Next.js, Tailwind CSS, and NeonDB. • Troubleshoot complex web infrastructure issues, including asynchronous data fetching, third-party API wallet interactions, and state management.	Jan 2026 – Present Bogota, Colombia
Asurion / AT&T In-Warranty <i>Bilingual Support Representative</i> • Assisted customers with warranty claims, device replacements, and product support while ensuring strict policy compliance. • Developed advanced time management skills to handle high-volume email and chat queues under pressure.	Apr 2024 – May 2024 Bogota, Colombia
Asurion <i>Customer Care and Sales Representative, Bilingual</i> • Delivered inbound troubleshooting, product recommendations, and digital security support for home technology users. • Improved customer experience KPIs by translating complex technical problems into user-friendly instructions.	Sep 2023 – Mar 2024 Bogota, Colombia
Concentrix <i>UHG / UHC DSNP Advocate, Customer Support Agent</i> • Provided accurate technical and plan information to members, reinforcing strong active listening, empathy, and technical reading comprehension.	Oct 2022 – Mar 2023 Bogota, Colombia

Bersacon
Business Development Representative
• Managed pipeline activity, lead tracking, and workflows within CRM platforms for complex enterprise (B2B) opportunities.

Jul 2021 – Aug 2022
Bogota, Colombia
